What makes Arriscraft Unique?

The key is our Natural Process technology, which creates natural stone form. We use raw and fine silica sand and other natural minerals to manufacture our Renaissance® Masonry Units. The result is that Arriscraft Renaissance® looks and performs like quarried stone.

The Arriscraft Advantage:

• High strength, high density, and natural absorption translate into superior durability;
• Exceptionally tight dimensional tolerances;
• No cement or chemical additives; Renaissance® is not subject to the degree of shrinkage associated with cement-based products;
• Consistent color throughout the entire stone; Renaissance® can be cut, chiseled and dressed in the field while maintaining its color and texture;
• Arriscraft products can contribute to LEED® points and to sustainability in the LEED categories of Energy and Atmosphere, Materials and Resources, and Innovation in Design.
• Arriscraft offers an industry-unique Lifetime Product Warranty.

Arriscraft is proud to be the chosen supplier for over 100 million square feet of wall area across North America.

Physical Properties

Renaissance® Masonry Units' compressive strength, durability and dimensional tolerances are within the range of those of quality limestone (ASTM C568) and sandstone products (ASTM C616). Renaissance® Masonry Units meet the severe-weathering requirements of ASTM C73 for Calcium Silicate units.

Important Notes

Colors and textures have been reproduced as closely as the printing process allows. Final selection should be made from actual samples. Renaissance® Masonry Units must be installed using industry recommended materials and techniques and conform to all related building code requirements. All masonry products are intended for above-grade installations. Proper care, installation and cleaning are required for warranty validation. Please refer to Arriscraft | DATA Renaissance® Masonry Units and Arriscraft | CARE Storage and Handling at www.arriscraft.com.

Authorized Arriscraft Dealer:
Renaissance® Masonry Units are manufactured to mirror natural stone formation, resulting in exceptionally tight dimensional tolerances, high strength and density, natural absorption and outstanding durability. A cement-free formulation and high temperature autoclave cure means the long-term shrinkage normally associated with concrete products is insignificant. Renaissance® can be used for both exterior and interior masonry veneer applications.

Renaissance® Masonry Units have been developed to withstand the most severe climates and are time-tested in extreme hot and cold environments. Lasting natural colors ensure the uneven fading and bleaching will occur over time. The stone breathes and ages naturally.

Renaissance® Masonry Units can be cut, chiseled, dressed or worked in the field. The rocked stones are individually hand finished, ensuring every stone is unique.

“...we wanted a rusticated stone aesthetic with smooth stone above and Arriscraft Renaissance® was the ideal material for the job. The product’s color, texture and scale were perfect for creating a strong base for the building.”
