Peerless Block and Brick Company has been a member of the mining community for over 50 years. We understand problems associated with deep mining and the risks involved. With this in mind, we developed our block and packaging to be as rugged as the Mining Industry.

Our patented “Strap Block System” has been rigorously tested and is designed to handle the harshest mining conditions. Since no mine is the same we offer not only a variety of blocks, but different cube configurations as well. This allows for transportation in all coal seam heights.

Due to bottom ash becoming unavailable, we now manufacture our blocks with a standard block mix that is both durable and tough. This allows us to meet and exceed all safety standards.

Most packages are bound by non-conductive plastic strapping to aid in the reduction of hand and eye injuries. This also helps in the prevention of fire. We have eliminated the need for pallets with the exception of our “Labor Saver” line. This helps reduce trash, lowers cost, and saves time spent on recovery.

Should an emergency take place, rest assured we have an “Emergency Order Protocol” for nights and weekends for a nominal fee per event.

We are here to help you, whatever it takes.

### 6” - 500 Series 3 Core Block

500 Series 3 Core utilizes STRAP-BLOCK® technology and measures 6”X8”X16”. It is packaged in three configurations and is 42 pounds per unit. This block replaces our original 6” solid unit.

**Cube Dimensions**
- 4 High Configuration = 55 Units
- 5 High Configuration = 70 Units
- 6 High Configuration = 87 Units

### 6” - 400 Series 3 Core Block

400 Series 3 Core utilizes STRAP-BLOCK® technology and measures 6”X8”X16”. Blocks are constructed using a standard materials to create a durable and strong unit. Each unit weighs approximately 32 pounds. This unit replaces the former 75% unit.

**Cube Configuration**
- 4 High Configuration = 55 Units
- 5 High Configuration = 70 Units
- 6 High Configuration = 87 Units

**Cube Dimensions**
- 40”X48”X22.75” High
- 40”X48”X28” High
- 40”X48”X36” High

### 6” - Labor Saver Block

Labor savers measure 6”X8”X24”. This block comes with pallet, wrapped and banded with metal straps. Each block weighs approximately 40 pounds.

**Cube Configuration**
- 5 High Configuration = 50 Units
- 6 High Configuration = 62 Units

**Cube Dimensions**
- 40”X48”X33” High (Including Pallet)

### 6” & 8” - Solid Concrete Block

Solid concrete block are also available in a 6” and 8” dimension and are packaged utilizing plastic strapping and configured in a T-Cube design. The 6” unit weighs approximately 52 pounds and the 8” unit weighs approximately 70 pounds.
