ARRIS®tile Renaissance® Units have become a favorite both for classic interior designs and for exterior applications in warm southern climates. ARRIS®tile Renaissance® Units can be adhered to suitable solid substrates. Developed for vertical wall applications, ARRIS®tile Renaissance® Units may be site cut, trimmed and finished to custom lengths, shapes or sizes.

Utilizing thinner cladding materials such as ARRIS®tile Renaissance® Units effectively reduces transportation and the structural components in the building envelope. This means a lower carbon footprint and lower costs may be achieved.

**Available Standard Features**
- Nominal 4", 8" and 12" face rises; nominal 24" lengths and 3/4" thickness
- Ten standard colors
- Rocked and Smooth textures
- Return corner units

**Optional Features**
- Custom colors (minimum order quantities may apply)
- Custom profiles (Refer to the Thin-Clad Profiles Guide)

**LATICRETE® MVIS™ Details**

**Exterior Wall**
Concrete wall — Method: Direct adhere with fluid applied waterproofing membrane

**Interior Wall**
Framed wall with Cement Backer board substrate

**DETAIL LEGEND**

- **A** ARRIS Tile
- **B** LATICRETE® Premium Masonry Pointing Mortar
- **C** LATICRETE Hi Bond Masonry Veneer Mortar
- **D** LATICRETE Air & Water Barrier
  (for warranty qualification some applications may require waterproofing and air and water barrier membrane)
- **E** LATICRETE Premium Fortified Mortar Bed
- **F** Metal Lath, 3.4# galvanized diamond wire lath
- **H** Permabase® cement board
- **I** EXP exterior rated sheathing
- **J** Concrete or masonry
- **K** Optional drainage barrier
NOTE: Substrates scheduled to receive manufactured stone, natural stone and thin brick must be structurally sound, rigid and conform to good design/engineering practices in accord with all applicable building codes with maximum deflection under all live, dead and impact loads, including concentrated and all anticipated loads of L/600 for all exterior veneer types. Steel and wood frame constructs shall also be designed to meet this criteria. Lateral bracing and edge support for cement backer board panels is required. Install sheathing panels as directed by board manufacturer’s installation instructions and building code requirements.

2. LATICRETE® Premium Pointing Mortar is designed to meet product applicable project specifications. LATICRETE Premium Pointing Mortar does not inhibit efflorescence from occurring in natural or manufactured stone facade installations. Efflorescence is a normal condition that may occur when installing portland cement based products. During installation, strike joints in a consistent time frame relevant to application time. Pointing mortar should be thumbprint dry before striking. Striking joints too early or too late can create color inconsistencies.

3. LATICRETE Premium Pointing Mortar color samples are guides only. LATICRETE does not warrant color matching to any color guide produced. Actual shade and texture will depend on job site conditions, lighting, installation techniques, and types of tile or stone used. Verify actual appearance and compatibility with a test area before installing. Blend colored mortars with different control numbers. No claims for color shade variations will be honored.

5. For information on pumpable scratch and brown coats, contact LATICRETE Technical Services.

6. For complete application information and limitations consult related Product Data Sheets and Execution Statements related to these details and applicable standards. See warranty Data Sheet 025.0SPD for full information and terms.

7. As a professional courtesy, LATICRETE offers technical services free of charge. The user maintains all responsibility for verifying the applicability and suitability of the technical service or information provided.
THE CHALLENGE

The explosive increase in popularity of this adhered masonry veneer facades has created a need for higher performance, factory produced installation materials to assure consistently high quality installations.

Up to now, the installation of adhered masonry veneers has required the use of site-mixed Type S or Type N mortars — materials that are subject to large variations in consistency, quality and performance and which also limit the installation technique to that of traditional masonry.

Projects that have been plagued by delaminating stone, water intrusion and other performance issues have left specifiers in need of a coordinated solution. This traditional method is not engineered as part of a complete wall system and therefore does not offer warranties from a reliable source willing to stand behind the installation.

THE SOLUTION

Realizing these opportunities, and based on our globally proven technology, LATICRETE has developed an installation system that provides a permanent, high strength installation that is freeze/thaw stable and protected from water intrusion.

Backed by either the LATICRETE® 15 Year System Warranty or 25 Year System Warranty*, the LATICRETE Masonry Veneer Installation System (MVIS™) allows for increased productivity utilizing either traditional masonry installation techniques or the “tile setter’s” method.

Vastly expanded architectural details are offered at www.laticrete.com/MVIS to help design professionals, contractors and installers understand the range of possible applications — and appropriate products and techniques which will assure long-term performance on projects of all types.

*See Data Sheet 230.15SPD and 025.0SPD for complete warranty information.

GREENGUARD Certified LOW VOC LEED COMPLIANT

Many companies might say their products are low VOC, only one independently certifies it — LATICRETE.

- Third Party GREENGUARD Certification, Required to Meet Stringent Indoor Air Quality Standards
- Certified by GREENGUARD for Children & Schools
- Helps Contribute Toward LEED Certification
- Product Certifications Readily Available at www.laticrete.com/green
**LATICRETE® Air & Water Barrier**

A single component, load bearing, vapor permeable, fluid applied, waterproofing, crack isolation, air barrier membrane. LATICRETE Air & Water Barrier produces a seamless, monolithic elastomeric coating and bonds directly to a wide variety of substrates.

- Install Adhered Masonry Veneers (AMV) in 1 – 2 hours
- Designed for use as an air and water barrier behind exterior wall claddings
- Excellent bond strength
- Improves energy and indoor air quality
- Easy to clean up with water
- Exceeds ICCES AC 212

**PACKAGING**

**Commercial Unit:** 5 gallon (19 l) pail liquid; 36 units per pallet.

**LATAPOXY® Waterproof Flashing Mortar**

LATAPOXY® Waterproof Flashing Mortar is an epoxy based 3 component, trowel applied, waterproofing and vapor barrier membrane. It can be used to waterproof seams, gaps or joints between a variety of substrates and metal and PVC pipe penetrations or flashing. It is specifically designed to be used under adhered masonry veneer, stone or brick for rapid installations which require a fast curing waterproof flashing. LATAPOXY Waterproof Flashing Mortar is flexible, easy to apply and will allow for rapid installations.

- Easy to apply using a trowel
- Adheres to metal and PVC pipes, drains and flashing
- Waterproof seam between flashing and adjacent waterproofing materials

**PACKAGING**

3.5 gallon pail with 2 LATAPOXY Waterproof Flashing Mortar Part A 1.4 lbs (0.65 kg), 2 LATAPOXY Waterproof Flashing Mortar Part B 1.15 lbs (0.5 kg), and 2 LATAPOXY Waterproof Flashing Mortar Part C 5.5 lbs (2.5 kg)

48 units per pallet.

**LATICRETE® Hi-Bond Masonry Veneer Mortar**

The ultimate, polymer fortified, thin-set mortar for interior and exterior installation of masonry veneer, stone, ceramic tile, quarry tile, pavers and thin brick. LATICRETE® Hi-Bond Masonry Veneer Mortar, designed to mix just with water, has a long open time with unsurpassed adhesion and workability.

**PACKAGING**

50 lb (22.7 kg) bag; 56 bags per pallet; Grey.

**MIXING**

Approximately 5.5 quarts (5.2 l) of water per bag.

**LATICRETE Hi-Bond Rapid Masonry Veneer Mortar**

The ultimate, fast setting, polymer fortified, thin-set mortar for interior and exterior installation of masonry veneer, quarry tile, pavers and brick. LATICRETE Hi-Bond Rapid Masonry Veneer Mortar is designed to mix with just water and provide unsurpassed adhesion and workability.

**PACKAGING**

25 lb (11.3 kg) bag; 104 bags per pallet; Grey.

**MIXING**

Approximately 3 quarts (2.9 l) of water per 25 lb (11.3 kg) bag.

Adhered Masonry Veneer Application Method 15 – 17 ft² (1.4 – 1.6 m²)
LATICRETE Masonry Veneer Mortar

LATICRETE Masonry Veneer Mortar is a patented, versatile polymer fortified mortar designed specifically for the installation of adhered masonry veneer, stone and thin brick. A high performance mix provides maximum non-sag performance for vertical installations and also obtains maximum bond strength to the substrate and selected veneers. Reinforced with Kevlar® for added strength, LATICRETE Masonry Veneer Mortar offers exceptional workability.

PACKAGING

40 lb (18.2 kg) bag; 56 bags per pallet; Grey.

**LATAPOXY® 310 Stone Adhesive**

A two-component, high strength construction epoxy adhesive for spot bonding large format tile and stone on vertical surfaces, for interior or approved exterior applications. Offers major advantages in terms of speed and productivity over mechanical anchoring, plaster and wire, and the thin-set method of veneer installation. Comes in both standard and rapid version for faster curing. Easier to work with when compared to traditional methods — no drilling, cutting of kerfs or setting of pins — LATAPOXY® 310 Stone Adhesive allows for quick, easy plumb adjustment while stone is in place to compensate for uneven walls and stone thickness variations. LATAPOXY 310 Stone Adhesive is permanent; it will not fail or deteriorate over time and is ICC and IBC approved.

**PACKAGING**

**Kit:** 2.6 gallon (10 l): All components packed in one carton; 40 cartons per pallet. Available in standard and rapid versions. 2 gallon (8 l): 1.06 quart (8 x l) units packed in one carton; 40 cartons per pallet. Available in standard and rapid versions.

**Cartridges:** 2.3 gallons (9 l) Cartridge Pack (for use in LATAPOXY 310 Cordless Mixer): 15 x 0.16 gallon (0.6 l) cartridges per carton, 27 cartons per pallet. Available in standard and rapid versions.

**MIXING**

Combine equal volumes of LATAPOXY 310 Stone Adhesive Part A and LATAPOXY 310 Stone Adhesive Part B (1:1). Do not mix more than approximately 0.13 gallons (0.5 l) of LATAPOXY 310 Rapid Stone Adhesive at a time.

**LATAPOXY 310 Cordless Mixer and Nozzles**

Triple your productivity of vertical stone and tile installations and dramatically reduce labor costs with the exclusive dual component LATAPOXY 310 Cordless Mixer. Quickly and easily dispenses LATAPOXY 310 Stone Adhesive onto tile, porcelain and stone veneers. Hundreds of square feet can be installed per day with less effort and greater success with this system. Patented design and gear system allow speed and dosing control for accurate applications every time. No mixing, just insert the dual component cartridge, screw on mixing nozzle and pull the trigger!

**PACKAGING**

One LATAPOXY 310 Cordless Mixer per carton; 24 cartons per pallet.
LATICRETE® Premium Masonry Pointing Mortar

LATICRETE® Premium Masonry Pointing Mortar is a premium factory prepared high performance, fast setting masonry pointing mortar that provides a masonry pointing mortar joint that is dense and hard. LATICRETE Premium Masonry Pointing Mortar is color consistent. Ideal for floors and walls (joint widths of 1/4” – 1/2” [6 – 12 mm]). Mix only with water.

COLORS
See Pointing Mortar Color Chart on page 14 for a list of available colors.

PACKAGING
25 lb (11.3 kg) bag; 104 bags per pallet.

APPROXIMATE COVERAGE
350–380 linear feet (107–116 linear m) with 1/4” deep by 3/8” (6 mm x 9 mm) wide joint

LATICRETE® Latasil™

High performance, 100% silicone sealant designed for use in coves, corners, changes in plane and expansion joints in exterior and interior applications of adhered masonry veneer. Can be used in fountains, water features and other wet area applications. LATICRETE® Latasil™ conforms to ASTM C920 and ASTM C794 adhesion properties and inhibits the growth of stain-causing mold and mildew in sealant joints with Microban® antimicrobial product protection.

COLORS
See Pointing Mortar Color Chart on page 14 for a list of available colors.

PACKAGING
10.3 oz (305 ml) cartridges; 6 cartridges per carton; 240 cartons per pallet.

Pointing Mortar and Sealant Color Guidelines
Pointing Mortar and sealant samples are guides only. LATICRETE does not warrant color matching to this color chart or to any color guide produced. Actual shade and texture will depend on job site conditions, lighting, installation techniques and types of adhered masonry veneer used, and may vary from this color chart, color channel kits and color swatch on product packaging. Verify actual appearance and compatibility with a test area before installing. Blend pointing mortar with different control numbers. No claims for color shade variations will be honored.
