**BANDING AND ACCENTS**
J oint sand stabilizing sealers perform two tasks at once. The sealer stabilizes the sand in the joints to prevent sand loss and to help retard weed growth. Sealer also provides the pavement with an even coverage of protection to seal the pavers making cleaning of any stains quick and easy. Depending on the application you can expect 3-5 years for patios and walkways from just one application and 2-3 years for driveways.
There are numerous pattern options using different sizes of pavers.
