

Peerless Block and Brick Company has been a member of the mining community for over 50 years. We understand problems associated with deep mining and the risks involved. With this in mind, we developed our block and packaging to be as rugged as the Mining Industry. Our patented "Strap Block System" has been rigorously tested and is designed to handle the harshest mining conditions. Since no mine is the same we offer not only a variety of blocks, but different cube configurations as well. This allows for transportation in all coal seam heights. Our blocks are manufactured with light weight aggregate, cement, and bottom ash. This greatly reduces the weight of our blocks and allows us to meet and exceed all safety standards. Most packages are bound by non-conductive plastic strapping to aid in the reduction of hand and eye injuries. This also helps in the prevention of fire. We have eliminated the need for pallets with the exception of our "Labor Saver" line. This helps reduce trash, lowers cost, and saves time spent on recovery. Should an emergency take place, rest assured we have an "Emergency Order Protocol" for nights and weekends for a nominal fee per event.

We are here to help you, whatever it takes.

6" - 75% Solid Back Saver Blocks

75% Solid Back Savers utilize STRAP-BLOCK® technology and measure 6"X8"X16". A variety of packages and **32 pound unit weight** makes this unit our top seller.

Cube Dimensions
 4 High Configuration = 55 Units
 5 High Configuration = 70 Units
 6 High Configuration = 87 Units

Cube Dimensions
 40"X48"X22.75" High
 40"X48"X28" High
 40"X48"X36" High

6" - Solid Back Saver Blocks

Back Savers utilize STRAP-BLOCK® technology and measure 6"X8"X16". Blocks are constructed using light weight materials to create a durable yet lightweight solid unit. Each six inch solid unit weighs approximately **40 pounds**.

Cube Configuration
 4 High Configuration = 55 Units
 5 High Configuration = 70 Units

Cube Dimensions
 40"X48"X22.75" High
 40"X48"X28" High

6" - Square Edge Block

Square Edge block are also available using the same light weight materials as the STRAP-BLOCK®. Square edge block are configured in same T-Cube design and weight approximately **40 pounds** each.

6" - Labor Saver Block

Labor savers measure 6"X8"X24". This block comes with pallet, wrapped and banded with metal straps. Each block weighs approximately **40 pounds**.

Cube Configuration
 5 High Configuration = 50 Units
Cube Dimensions
 40"X48"X33" High (Including Pallet)

8" - Solid Concrete Block

The 8" Solid Block measures 8"x8"x16" and is packaged and strapped in a T-Cube configuration. Each block weighs approximately **52 pounds**.

Cube Configuration
 5 High Configuration = 70 Units
Cube Dimensions
 40"X48"X33" High

8" - 2 Core Smooth Regular Block

The 8" two-core standard block are manufactured to ASTM C90 standards. Block are strapped and on a pallet. Each block weighs approximately **36 pounds**.

Cube Configuration
 5 High Configuration = 90 Units
Cube Dimensions
 48"x48"x44" High

2" & 4" - Solid Block

Usually used for cap block or to fill voids, these units offer high compressive strength and durability for superior performance. Block are strapped and palletized.

Cube Configuration
 2" Slds = 324 Units 4" Slds = 144 Units
Cube Dimensions
 48"x48"x38" High

The following numbers are for your use should you have an emergency and need to order block after normal business hours through the week, on weekends, or on holidays.
